

UNI-CRAFT SOLUTION SPOTLIGHT

PASS-THROUGH UPENDER WITH SHUTTLE PLATE

Problem

A mold manufacturer was unable to safely flip and position varying sizes of molds for assembly workers to access the mold and complete the assembly process.

Our Solution

The Pass Through Upender with Shuttle features two independently controlled platforms, which enable them to articulate with higher precision while supporting and positioning products for safe assembly. The platforms can lay 180° flat for products to simply “pass through” processing and can also tilt up to 95°. For heavy, round, or odd-shaped objects such as molds, extra product support and security is essential. Uni-Craft Corp. mounted a v-shaped Shuttle carrier to one of the platforms, adding a cradling effect to ensure stable object positioning and repositioning.

Customer Profile

Location: Mexico
Market Segment: Mold Manufacturer
Application: Product positioning

The Uni-Craft Solution, Taking Solutions to New Heights

Uni-Craft Corp. offers a broad line of positioning equipment including scissor lifts, tilt tables, mast lifts and upenders to address the industrial ergonomic and safety needs of the manufacturing, assembly, automotive and food industries. We are taking solutions to new heights.

- ✓ Equipment designed to fit
- ✓ Controls and accessories
- ✓ Design and training support
- ✓ Parts and service
