

UNI-CRAFT SOLUTION SPOTLIGHT

PASS-THRU UPENDER

Problem

A customer with extreme space constraints was unable to flip awkward, bulky furniture 90 degrees to palletize in preparation for shipping.

Our Solution

A Pass-Through Upender equipped with two independent platforms that can lay flat to allow products to “pass-through” from one conveyor line to the next or lift independently to flip or turn products. Each side of the Upender can be controlled, allowing workers to position the bulky furniture safely onto a pallet for shipping. The Pass-Through Upender provides control options to increase safety and precision.

Customer Profile

Location: Indiana
Market Segment: Furniture Manufacturer
Application: Product Positioning
